

2.8.3 Alkaloidy z fenylalaninu a tyrosinu

2.8.3.1 Fenylethylaminy

☞ Ephedraceae - *Ephedra* sp.

☞ Rutaceae - *Citrus* sp.

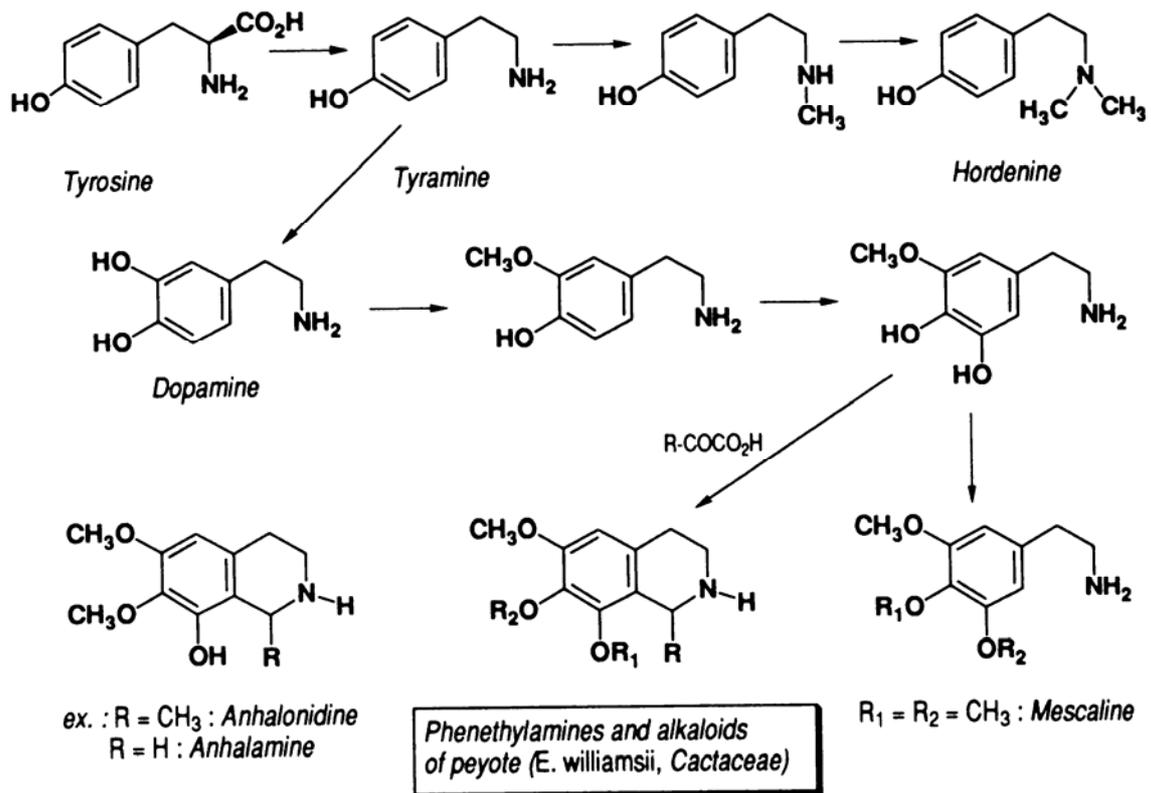

☞ Celastraceae - *Catha edulis*

2.8.3.2 Isochinolinové alkaloidy

2.8.3.2.1 Jednoduché tetrahydroisochinoliny

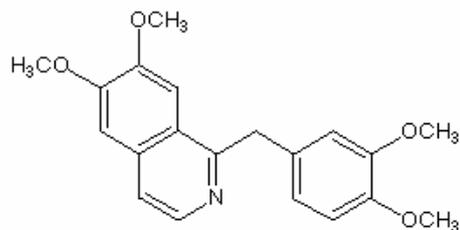

☞ Cactaceae - *Echinocactus williamsii*

2.8.3.2.2 Benzylisoquinoliny

Jednoduché benzylisochinoliny:

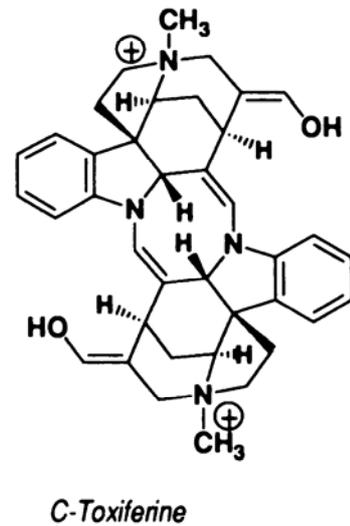

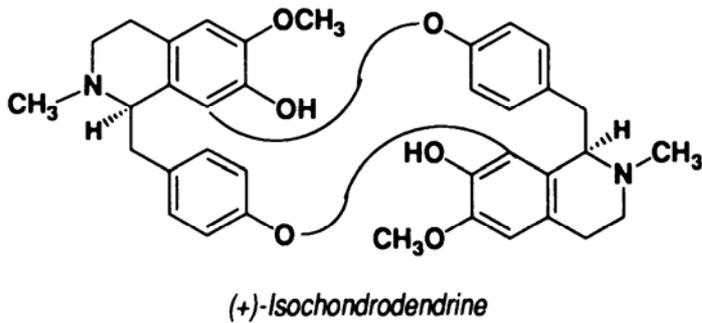

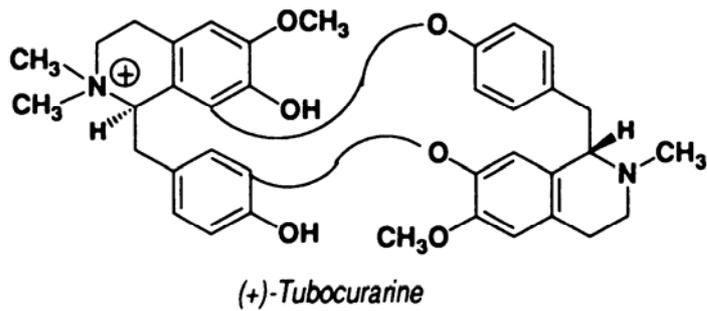

📁 Papaveraceae - *Papaver somniferum*

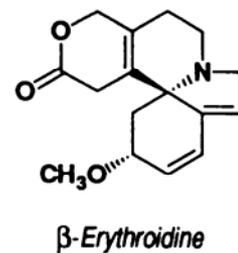

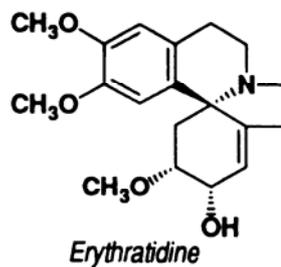

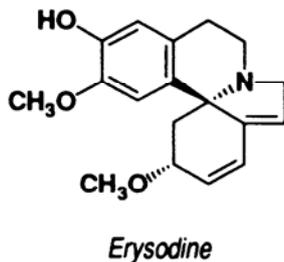

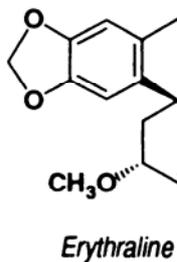

Bisbenzyltetrahydroisochinoliny

📁 Menispermaceae - *Chondrodendron* sp.

📁 Loganiaceae - *Strychnos* sp.

☞ *Erythrina*-alkaloidy (biologický účinek podobný kurare)

Aporfinové alkaloidy: ca 500 alkaloidů

☞ Annonaceae – *Anaxagorea* sp., *Annona* sp.

☞ Fumariaceae – *Corydalis* sp.

☞ Lauraceae – *Laurus nobilis*

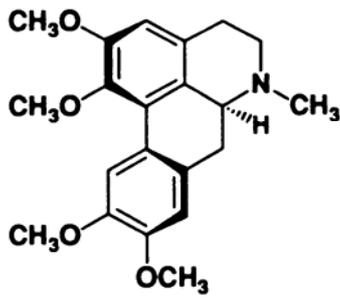

☞ Magnoliaceae – *Liriodendron tulipifera*

☞ Menispermaceae – *Anamirta cocculus*

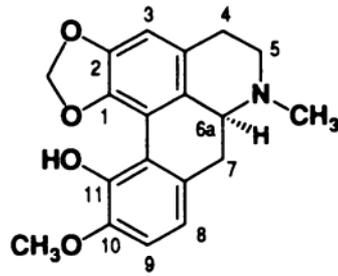

☞ Monimiaceae – *Peumus boldus*

☞ Papaveraceae – *Eschscholzia californica*, *Chelidonium majus*

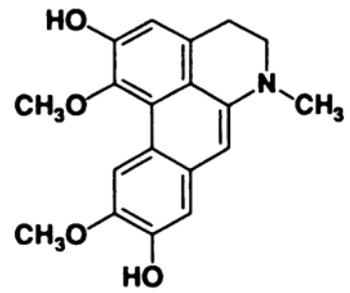

☞ Ranunculaceae – *Caltha palustris*, *Caulophyllum* sp., *Aconitum* sp.

S (+)-Glaucine

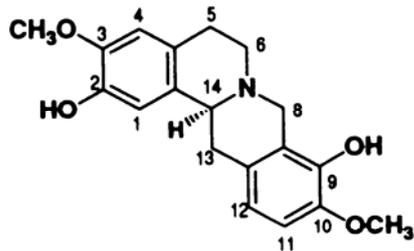

S (+)-Bulbocapnine

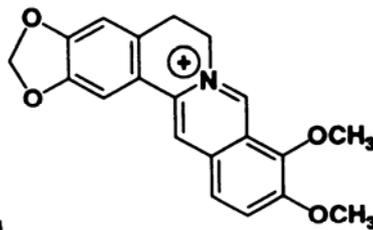

Dehydroboldine

Protoberberiny a jejich deriváty

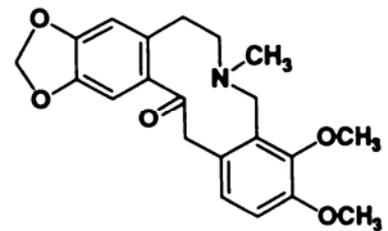

- ☞ Annonaceae – *Annona* sp.
- ☞ Berberidaceae – *Berberis* sp.
- ☞ Fumariaceae - *Fumaria officinalis*
- ☞ Menispermaceae - *Jateorhiza palmata*
- ☞ Papaveraceae - *Chelidonium majus*, *Sanguinaria canadensis*, *Papaver rhoeas*
- ☞ Ranunculaceae - *Hydrastis canadensis*

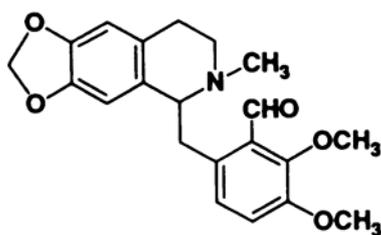

Scoulerine

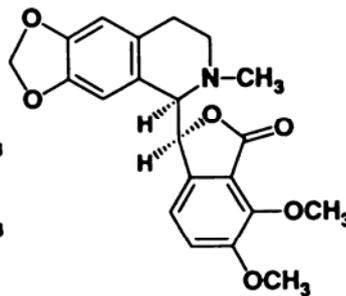

Berberine

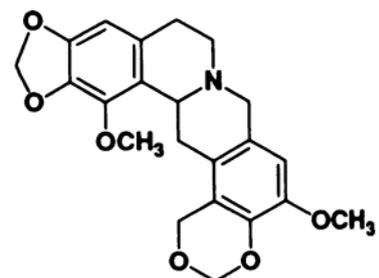

Allocryptopine

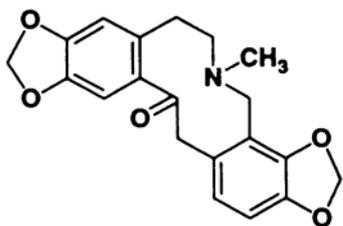

*Canadaine
(secoberberine)*

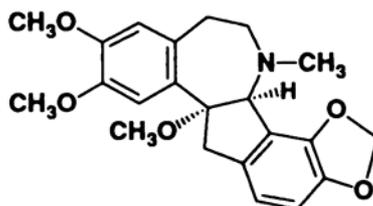

(-)-β-Hydrastine

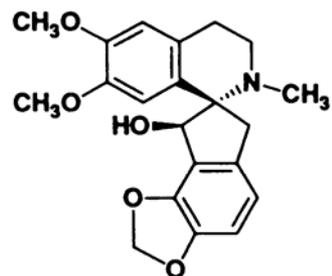

Orientalidine

Protopine

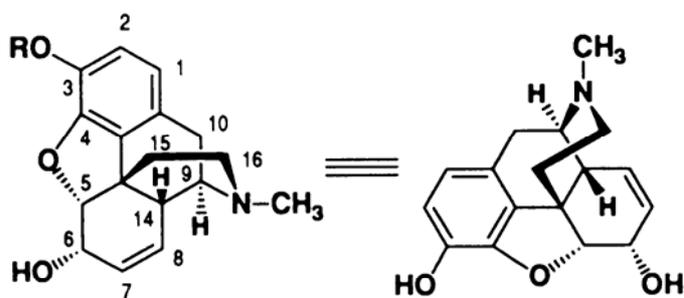

Fumaritrine

Fumaricine

Morfinany

☞ Papaveraceae - pouze *Papaver* sp. (rozdíl od protoberberinů)

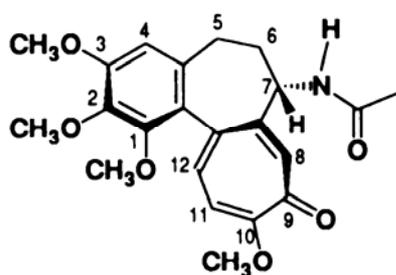

R = H : *Morphine*
R = CH₃ : *Codeine*

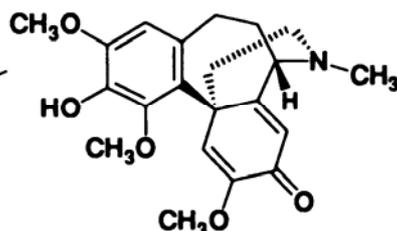

Thebaine

Fenylethylisochinoliny

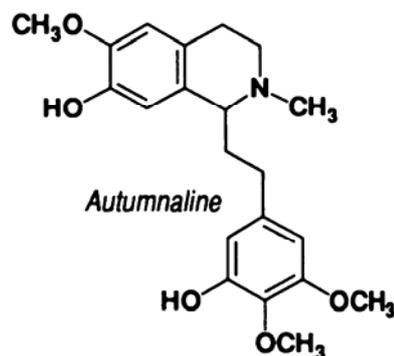

☞ Liliaceae - *Colchicum autumnale*

Colchicine

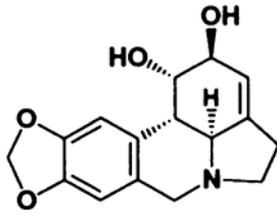

Androcymbine

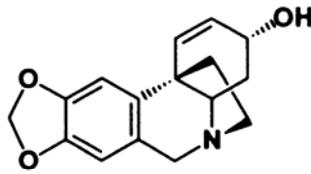

Autumnaline

Alkaloidy rostlin čeledi Amaryllidaceae

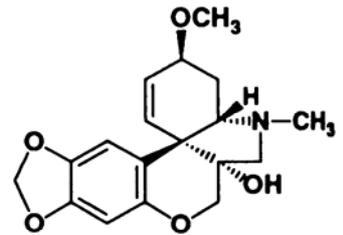

☞ *Galanthus* sp., *Narcissus* sp., *Crinum* sp., *Lycoris* sp. aj.

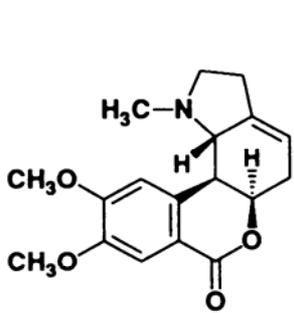

Lycorine

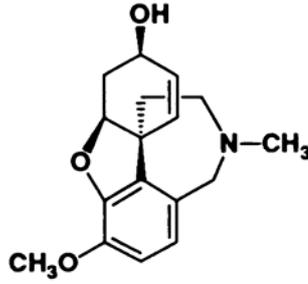

Crinine

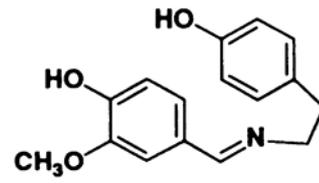

Tazettine

Homolycorine

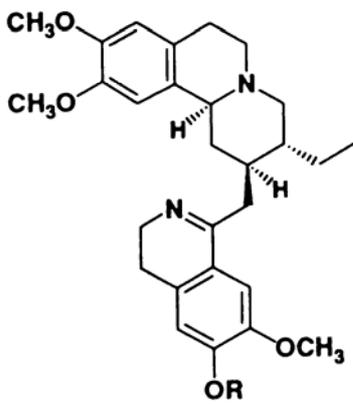

Galanthamine

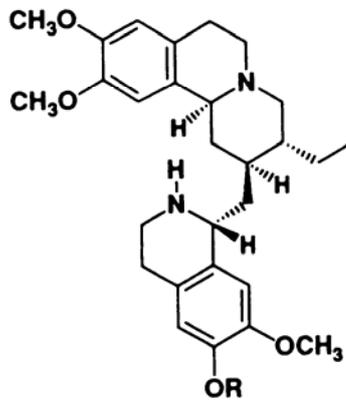

Isocraugsodine

Monoterpenoidní isochinolinyl

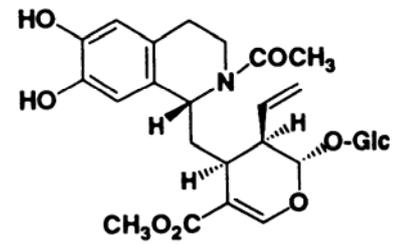

☞ Rubiaceae - *Cephaelis* sp.

R = H : Psychotrine
R = CH₃ : O-Methylpsychotrine

R = CH₃ : Emetine
R = H : Cepheline

Ipecoside
